ABOUT ME

Computer Science student passionate about Quantum Computing, Data Science, and AI. Currently pursuing B.Tech CSE (Data Science) at SRM Institute of Science and Technology alongside a BS in Data Science from IIT Madras. Strong interest in quantum algorithms, computational research, and emerging technologies with experience in hackathons, collaborative development, and technical problem-solving.

EDUCATION

IIT Madras	Bachelor of Science(Data Science)		2025 – 2029
SRM Institute of Science and Technology	Bachelor of Technology	9.05/10	2025 – 2029
Kendriya Vidyalaya	Class XII	7.05/10	2023 – 2025
Kendriya Vidyalaya	Class X	8.80/10	2022 – 2023

WORK EXPERIENCE

NIT Silchar | Intern – Deep Learning and Machine Learning

May 2026 – July 2026

- Developed deep learning–based detection and segmentation models for identifying and segmenting structural building cracks, with severity-based assessment.
- Implemented and optimized YOLO-based computer vision models for model training, validation, and performance evaluation.
- Authored and published a research journal in IEEE presenting the methodology, experimental evaluation, and findings of the developed approach.

PROJECT WORK

QuantaFeat | Quantum-Based Supply Chain management

Mar 2026

- Developed a quantum-inspired supply chain optimization platform that evaluates multiple possible outcomes before execution to improve decision-making and efficiency.
- Implemented Dijkstra’s Algorithm for optimized route computation and integrated Qiskit to explore quantum-based simulation approaches.
- Built during a 36-hour national-level hackathon through rapid prototyping, collaborative development, debugging, and team-based problem-solving.

MindBloom | Developer

Jan 2026

- Developed a role-based mental wellness platform designed for students, therapists, and administrators within a unified and secure digital environment.
- Built features focused on emotional well being tracking, mental health monitoring, and user-centered accessibility through a minimal and calming interface.
- Contributed to collaborative development, debugging, work flow management, and scalable implementation using GitHub-based development practices.

SKILLS

- Skills in languages viz Python, C++, C, HTML, CSS, Qiskit.
- Worked in fields like Algorithms, Machine Learning, Data Science, etcetra.
- Well-versed in Git and Github.

REPRESENTATIVE ROLES

- Student body Representative at Kendriya Vidyalaya **(2024 - 2025)**
- Head of Operations for Zephyr(English Literature Club) at SRM Institute of Science and Technology **(2026 - Present)**
